Air Resources Board
State of California

To Whom It May Concern:

My name is Mike Rano. I am a disabled, U.S. Navy Veteran. During my service in the Navy, I was exposed to the chemical CIDEX. This chemical destroyed 50% of my lung capacity. I also suffer from chronic asthma. Since 1989, I have required daily use of a variety of bronchial dilators and steroids.

Five weeks ago, my wife and I purchased air purifiers which have significantly changed my breathing from very poor to nearly normal. Not only has my breathing improved, but my snoring is almost non-existent. Because of these purifiers, I no longer have to use my hand-held nebulizer. Instead of daily use, I now use only 2 sprays of albuterol twice a week when I go to a public health club to exercise.

I find that breathing clean air in my home as increased my breathing capacity tremendously. And, I continue to feel that I am breathing better every day.

Thank you for allowing my input. I offer nothing but the highest of praise for these air purifiers.

Sincerely,

Mike Rano
